

The Mobile Medical Team Project

Istanbul Metropolitan Municipality introduced a new service entitled Mobile Medical Team.

Sector: Healthcare

Project Type: A soundproof mobile generator system.

Customer's requirements

A mobile medical team would use a fully-equipped vehicle to provide medical services in areas where no municipal clinics are available. Developed especially for people not being under the cover of social security and living in areas where no local municipal clinics are available, this project provide an analysis laboratory, EKG and X-ray equipment, a surgical theater, a clinic of internal diseases, and a pediatric clinic. The customer needed a reliable mobile generator system for this project.

Solution developed by Teksan Jeneratör

Teksan provided a 33 KVA diesel generator group installed in a cabin for this project which is important in terms of improving the quality of healthcare services available in Istanbul. Teksan also undertook to provide maintenance services for said generator for 2 years.

Results obtained

The above mentioned generator system was supplied to help the mobile medical team to provide medical services without interruption.
